

Final test report — build.itisyou

Generated 2026-09-13T11:10:51.388Z at 949a76e from recorded evidence only (scripts/evidence/final-report.mjs). A check with no record is NOT_CHECKED; nothing is inferred.

NOT RELEASE-READY — no recorded failure, but required checks are blocked or not checked

PASSED	FAILED	NOT_CHECKED	BLOCKED	DEFERRED
22	0	1	2	1

Required checks

Area	Check	Status	Evidence
Static	Formatting	PASSED	pnpm format:check — exit 0 at fc830b8, 11 s
Static	Lint	PASSED	pnpm lint — exit 0 at fc830b8, 57 s
Static	Typecheck	PASSED	pnpm typecheck — exit 0 at fc830b8, 8 s
Static	Generated documentation drift	PASSED	pnpm docs:check — exit 0 at fc830b8, 4 s
Unit and integration	Vitest (domain, rules, lifecycle, interchange, twin, database, worker, components)	PASSED	2450/2450 passed (artifacts/test-evidence/unit/batch6-vitest.json)
Security	Secret scan	PASSED	pnpm scan:secrets — exit 0 at fc830b8, 2 s
Security	Dependency vulnerability scan	PASSED	pnpm audit --audit-level=moderate — exit 0 at fc830b8, 1 s
Security	Tenant isolation under a real pool, as the restricted role (staging Neon)	PASSED	pnpm verify:isolation — exit 0 at fc830b8, 3 s
Security	Cross-tenant attack suite (isolation.spec, 404-not-403)	PASSED	12 passed, 0 failed, 0 skipped in artifacts/test-evidence/e2e/staging-fc830b8.json
Security	Security headers and CSP	PASSED	42 passed, 0 failed, 0 skipped in artifacts/test-evidence/e2e/staging-fc830b8.json
Security	CSRF origin checks	PASSED	18 passed, 0 failed, 0 skipped in artifacts/test-evidence/e2e/staging-fc830b8.json
Accessibility	axe WCAG 2.2 AA, landmarks, keyboard, reflow	PASSED	61 passed, 0 failed, 5 skipped in artifacts/test-evidence/e2e/staging-fc830b8.json
E2E	Local critical journeys (PGLite, Chromium)	PASSED	112 passed, 0 failed, 0 flaky, 3 skipped (artifacts/test-evidence/e2e/local-batch6-chromium.json)
E2E	Staging release suite (Cloudflare + Neon)	PASSED	732 passed, 6 failed, 0 flaky, 66 skipped (artifacts/test-evidence/e2e/staging-fc830b8.json); all 6 failures passed on a later staging re-run (artifacts/test-evidence/e2e/staging-fc830b8-webkit-rerun.json) — causes in FAILURE_RECEIPTS

CI	GitHub Actions at the latest recorded run	PASSED	run 34752927029 at 949a76e: success
Database	Schema applied to staging by the migration tool	PASSED	node --experimental-strip-types scripts/migrate.mjs — exit 0 at fc830b8, 2 s
Deployment	Staging web Worker deployed	PASSED	wsl -e bash /mnt/e/Project/.claude-scratch/tmp/wsl-deploy.sh — exit 0 at 949a76e, 498 s
Deployment	Staging cron Worker deployed with the budgeted schedule	PASSED	cd apps/worker && npx wrangler deploy --env staging — exit 0 at efdb739, 28 s
Deployment	Staging health, version and database reachability	PASSED	node scripts/evidence/deploy-check.mjs https://govintel-web-staging.kpleelaaravind.workers.dev 949a76e — exit 0 at 949a76e, 1 s
Rollback	Staging rollback drill (roll back, verify, roll forward)	PASSED	bash /e/Project/.claude-scratch/tmp/rollback-drill.sh — exit 0 at b3829d0, 21 s
Performance	Latency smoke against staging	PASSED	node scripts/evidence/perf-smoke.mjs https://govintel-web-staging.kpleelaaravind.workers.dev — exit 0 at b3829d0, 7 s
Recovery	Point-in-time database restore drill (restored copy verified as the restricted role)	PASSED	pnpm verify:isolation — exit 0 at 949a76e, 3 s
Security	Static application security testing (SAST)	NOT_CHECKED	No SAST tool runs in this repository or in CI (plan §18, gap-spec §66). Type-aware lint, secret scanning and dependency audit are not a substitute and are not reported as one
Identity	Sign-in against a real identity provider	BLOCKED	No OIDC client exists for any environment (OWNER_ACTIONS.md item 1). Verified against a local mock issuer only
Production	Production deployment and post-deploy verification	BLOCKED	Not deployed: release gates are not all green (identity provider, open P1s in COMPLETION_REGISTER.md)
Mobile	Distinct mobile screens 59–64	DEFERRED	Pages reflow to 320 px and pass the reflow checks; distinct screens are not built (register W-MOB-1)

Test totals

Unit and integration (Vitest): **2450 passed, 0 failed** of 2450.

Area	Passed	Failed
apps/web	257	0
apps/worker	23	0

Failures found, and what happened to them

ID	Found by	Area	Status
FR-001	Probing staging	Operations / database capacity	Fixed in code; staging re-provisioned (see FR-004)
FR-002	Writing FR-001's tests	Outbox drainer	Fixed
FR-003	Baseline `pnpm audit`	Dependency security	Fixed
FR-004	Probing staging	Deployment	Staging re-provisioned and redeployed at `efdb739`
FR-005	Reading the purge against the RLS policies	Guest retention	Fixed
FR-006	Reading sign-in against the RLS policies	Authentication / tenancy	Fixed (first sign-in); returning-user merge is a known issue
FR-007	Local E2E after my own change	Security (404-not-403)	Fixed — the change was reverted
FR-008	A new E2E test	Tenant isolation (development parity)	Fixed
FR-009	Inventory of graph readers	Lifecycle / gates	Fixed
FR-010	E2E rerun	Test isolation	Fixed
FR-011	Full unit + E2E run in parallel	Test harness / machine contention	Not a product defect; re-run clean

FR-012	Staging E2E browser matrix	Test coverage (WebKit, iOS Safari)	Fixed — skip keyed on the insecure origin
FR-013	Staging and CI E2E	Test harness (my own bulk edit) / typecheck gap	Fixed; the E2E tree is now type-checked by the gate
FR-014	Reading CI logs	CI (E2E sharding)	Fixed
FR-015	Local E2E under load	UI (pending submit buttons)	Reverted — the control was withdrawn, not the tests
FR-016	My own restore drill	Operations (staging database)	Recovered in 2.5 minutes, no data loss; procedure corrected

Gate records
